

CONFIDENTIAL

02 JUN 1982

MEMORANDUM FOR: Special Assistant, Interdepartmental Staff,  
O/DCI

FROM: [REDACTED]

25X1

Chief, Programs Staff, SOVA

SUBJECT: Topics for DCI and DDCI Discussion with the  
Secretary of Defense

1. We propose that the DCI or DDCI briefly note the success of a cooperative CIA, DIA, and Army effort named Land Armaments and Manpower Model (LAMM). [REDACTED]

25X1

2. The objective of the effort was to create an automated data base containing agreed assessments of the order of battle, organization, and equipment holdings of all Soviet and NSWP ground force units from 1960 to the present, and project them to 2000. [REDACTED]

25X1

3. This ambitious project was conceived by CIA, but actively supported by DIA and Army with inputs from other agencies. [REDACTED]

25X1

4. To this point the project has been an unqualified success. These data are already being used by OSD/PA&E, JCS/SAGA, and the Army Concepts and Analysis Agency, as well as by Army ACSI to support Army R&D and force development planning. [REDACTED]

25X1

5. DCI acknowledgement of this successful joint venture to the Secretary of Defense might help to reinforce DoD intelligence managers' enthusiasm for future efforts of this kind--an attitude we in SOVA are trying to promote. [REDACTED]
